PORTFOLIO

south dakota bit
bureau of information & telecommunications
A number of years ago, BIT determined that an area of agency IT need was not being met by Development. That area was robust, state of the art, web development. BIT Development started recruiting accomplished web developers who were also talented graphic artists/graphic designers. Some of these developers also had marketing degrees.

BIT was very successful in hiring this talent and now has multiple staff with the expertise to develop eye-catching, state of the art, easy-to-use websites for your agency. BIT is also able to develop mobile ready/responsive websites that will work seamlessly from your desktop browser to your tablet to your mobile phone. BIT is committed to supporting agency websites and is able to respond quickly to agency needs.
The 125th website was a single location for the public to learn and read about what the 125th planning committee did. It was also a place for the public to stay informed and participate by submitting ideas for the celebration.

The Legislative Audit serves the legislators, government officials and citizens of the State of South Dakota by providing quality independent audits and assistance to the State of South Dakota and local governments.
b Ready is under the direction of the South Dakota Emergency Management office. It provides information for agencies and citizens of South Dakota pertaining to emergency preparedness.

The BIT website is a place to showcase the services BIT provides as well as stay informed about the latest standards and rates. Also, it is a place to find information about BIT’s Point of Contacts and Project Managers.
dhs.sd.gov is a universal website containing vital information for agencies and citizens of South Dakota who are in need of assistance pertaining to human services resources which include career training, disability resources, etc.

drought.sd.gov

The Governor’s Drought Task Force website is a portal to information with tips and updates when South Dakota is in a drought. It also provides the minutes from meetings held by the Drought Task Force.
The South Dakota Lottery website is full of information and resources which includes winning numbers, legislative news, and commission news.

DLR promotes economic opportunity and financial security for individuals and businesses for the State of South Dakota.
The Department of Revenue website is a resource for tax information and forms. It is a place where people are able to submit their taxes, renewal of motor vehicle licenses and allows users to learn about the latest tax news.

The Legislative Research Council website allows you to stay up to date with the legislative session. It allows you to search bills, laws, and rules from not only the current year, but from previous years as well. Also, users can create their own E-Subscribe account which allows them to create lists of legislation they want to track and it also sends emails when a bill is updated.
The South Dakota Giant Vision Awards website contains information and applications for the Governor’s competition for businesses and students presenting new, innovative ideas.
The SD.gov website is a portal that takes users to the resources they need. Some of these resources include state agency websites, employment opportunities, travel information, and legislative information.

The South Dakota Wildland Fire website contains information pertinent to enhancing public safety through the collection and dissemination of timely, accurate, and useable wildfire information.
The Division of Consumer Protection is your resource for important consumer information.

Ready To Partner is a program within the Governor’s Office of Economic Development.
The Veterans Affairs website was created to provide veterans the information they need. This includes benefits they can receive and how to find their veterans service officer. It also has information about upcoming events, progress on current projects, and a wealth of resources veterans can take advantage of.

The mission of DENR is to protect public health and the environment by providing environmental monitoring and natural resource assessment, technical and financial assistance for environmental projects, and environmental regulatory services.
Much like the industry we work in, this portfolio is ever changing and growing.

Please contact BIT for additional web services and more information.
